Application/Control Number: 10/088,962

Art Unit: 1712

DETAILED ACTION

Claim Objections

1. Claims 10, 20 and 23 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 10 and 23 depend from claims 8 and 19, respectively, which do not teach that the substituent R# may be hydrogen. Claim 20 teaches that R may comprise 8-30 carbon atoms and z is an integer of 1-30, which is outside the scope of 8-18 carbon atoms, and 2-12 ethoxy units taught by parent claim 19.

Claim Rejections - 35 USC § 102

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 1. Claims 1-9, 11-22 and 24-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Qu et al. (6435277 B1).

Qu teaches a composition for improving the permeability of a subterranean formation which comprises a cationic surfactant and a nonionic surfactant within the scope of the present invention (see column 8, lines 31-54, column 7, lines 56-65, the

Application/Control Number: 10/088,962

Art Unit: 1712

cationic and nonionic surfactants of columns 21 and 22, and example 25 which teaches a specific example within the scope of the present invention).

2. Claims 1, 6, 7, 14, 15, 17-21 and 25-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Urfer (5627144).

Urfer teaches a composition which is used to treat a subterranean formation which comprises a cationic esterquat, an alkyl polyglucoside, and a fatty alcohol, which is a nonionic surfactant (see example 7). The composition of example 1 of Urfer anticipates the composition claims of the present invention, since an intended use does not distinguish over the prior art (<u>In re Pearson</u> 181 USPQ 641).

Claims 1-9, 11, 12, 14, 15, 17, 19-22 and 24-28 are rejected under 35
 U.S.C. 102(b) as being anticipated by Frazier (5246072).

Frazier teaches a method of treating a subterranean formation using a composition which comprises a cationic surfactant, and a nonionic surfactant within the scope of the present invention (see column 3, line 4 – column 4, line 33, and examples 2 and 3).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C Tucker whose telephone number is 703-308-0529. The examiner can normally be reached on Monday - Friday, Flexible schedule.

Application/Control Number: 10/088,962

Art Unit: 1712

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Dawson can be reached on 703-308-2340. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0651.
